Operational objectives and prioritisation

The overarching objective of the framework is to operationalise section 5N and 5Mf, in a way that is consistent with the following:

- **Effective** service delivery. To maximise value and performance of operations.
- **Efficient** and sustainable resourcing, including operating within allocated resources.
- Systematic and principled approach to **embedding** across the organisation. Including, clarity around responsibilities and interdependences and capability building.

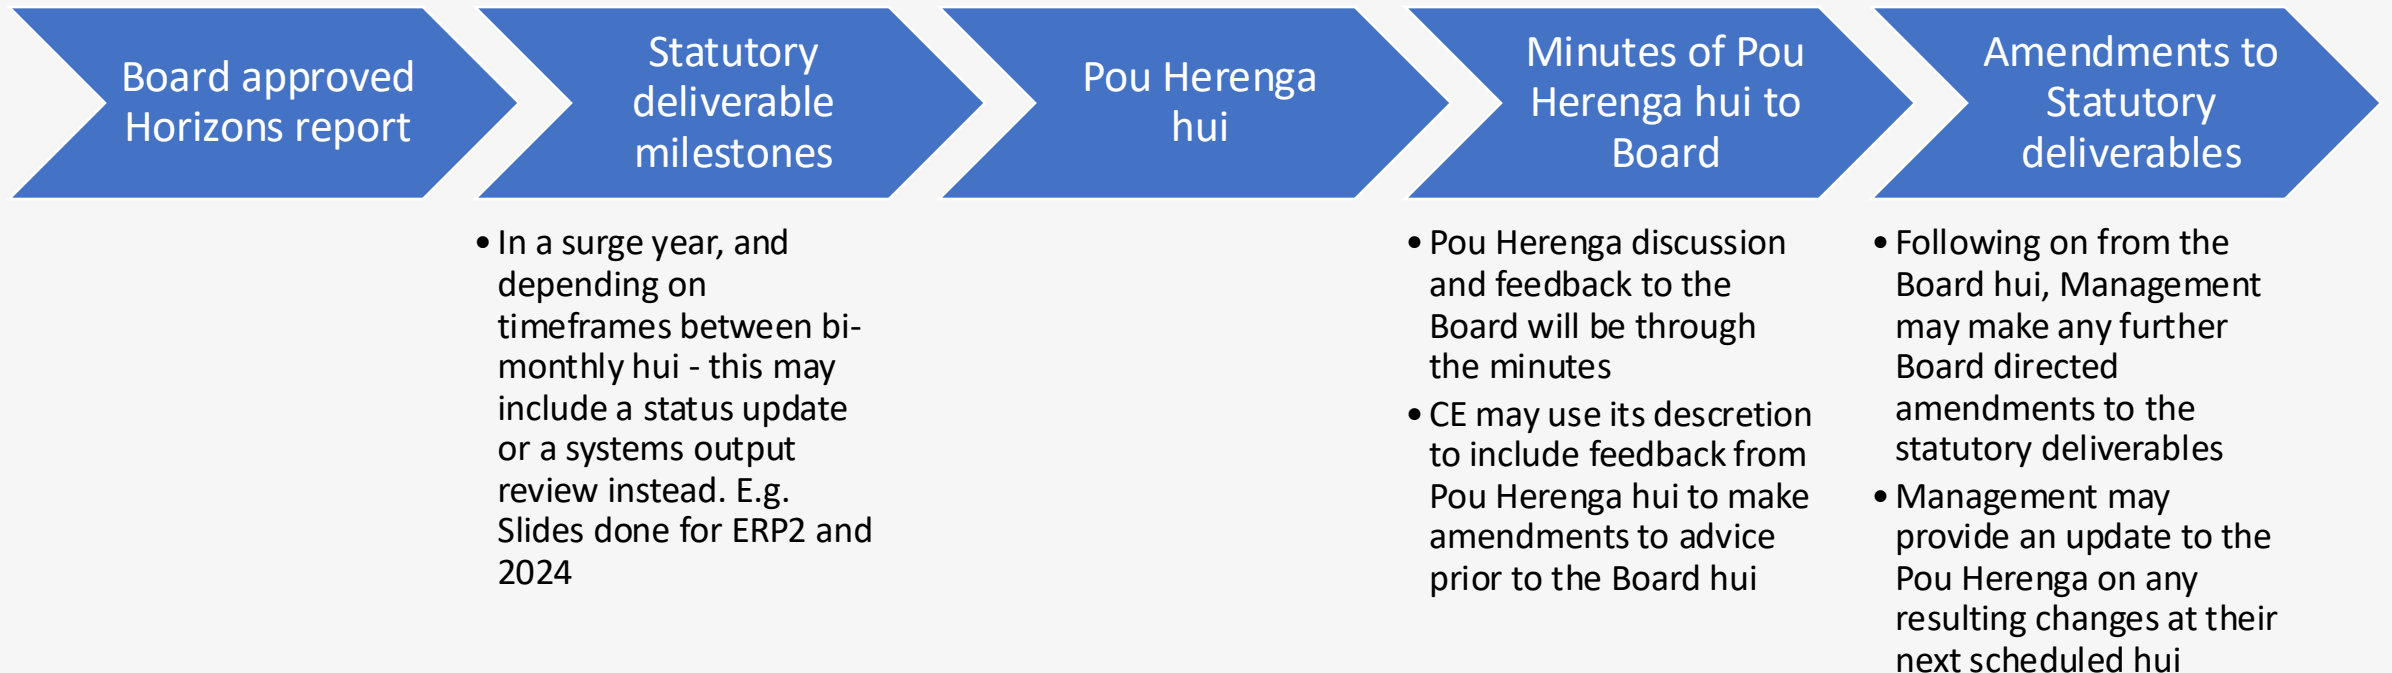

The three objectives provide the foundation for a prioritisation matrix. This provides a methodical way of planning and allocating mahi, and maximising the value-add of outputs:

Objectives	Prioritisation		
	Effective	Efficient	Embedding
Effective service delivery. To maximise value and performance of operations.	Bottomline	Priority. This provides the circuit breaker to ensure we are not working in an adhoc way.	Futureproofing. This ensures a shared culture of working that is sustainable.

Approach to canvassing Pou Herenga

2024 Surge year

- The statutory deliverables increase significantly from two to seven
- The statutory deliverables will be at different stages when a Pou Herenga hui falls
- A mixed approach to canvassing Pou Herenga is needed to reflect this, which may include:
 - General status reporting;
 - Consultation on key systems, such as, operational framework, engagement strategy and key evidence products (Literature review templates etc);
 - Wānanga around Iwi/Māori priority matters; or
 - Consultation on draft deliverables

Agenda Item #7 provides the particulars around current statutory deliverables
